CONTENTS

CHAPTER 1 PERICYCLIC REACTIONS **1-126**

- **PERICYCLIC REACTIONS** **1**
  FRONTIER ORBITAL APPROACH1 3
- **CORRELATION DIAGRAMS** **5**
  The π Molecular orbitals of cyclodhexadiene 10
- **ORBITAL SYMMETRY IN CYCLOADDITION REACTIONS** **11**
  Correlation Diagram 11
- **HÜCKEL–MOBIUS(H–M) APPROACH FOR PERICYCLIC REACTIONS** **14**
  AROMATIC TRANSITION STATE 14
- **ELECTOCYCLIC REACTIONS** **16**
  Examples of Thermal Electrocyclic Reactions 18
- **Photochemical Electrocyclic Reactions** **27**
- **Metal catalysed Eelctrocyclic Reactions** **30**
  Electrocyclic reactions in ionic conjugated systems 32
- **PROBLEMS RELATING ELECTROCYCLIC REACTIONS** **35**
- **CYCLOADDITION REACTIONS** **44**
- **Reactivity** **53**
- **Regioselectivity** **56**
- **Stereoselectivity and *Endo* effect** **58**
- **Catalysis in Diels-Alder Reaction** **63**
- **The Retro Diels-Alder Reaction** **64**
- **Examples of Retro Diels-Alder Reactions** **65**
  Mechanism : 66
- **1,3-DIPOLAR CYCLOADDTIONS** **68**
  Examples of 1,3-Dipolar addition 69
  Examples of 1,3-Dipolar Cycloadditions 72
- **Retro 1,3-Dipolar Cycloadditions** **77**
- **Photochemical Cycloaddtions** **80**
  Multicomponent Cycloadditions 81
- **Photochemical [2+2] Cycloadditions** **81**

- **Other [2+2] Cycloadditions** **84**
- **Retro [2+2] Additions** **86**
  More examples of retro [2+2] cycloaddition reactions : 87
- **Cheletropic Reactions** **88**
  Addition of carbenes and nitrenes 90
  Examples of Cheletropic Reactions and Extrusions 91
- **[2+2+2] Cycloadditions and Eliminations** **95**
- **[2 + 2 + 2 + 2] Cycloadditions (Four component addition)** **97**
- **Theory of cycloaddition reactions with more than two components** **97**
- **Group Transfer Reactions** **98**
- **Correlation Diagram for the concerted Transfer of two Hydrogen Atoms from Ethane to the Termini of Butadiene** **99**
- **Prismane** **100**
  Formation of π orbitals of benzene from σ orbitals of prismane : 101
- **Dewar Benzene** **102**
- **The Ene Reaction** **105**
- **Retro ene Reactions** **107**
- **The Cope Elimination and related reactions** **110**
- **PROBLEMS RELATING CYCLOADDITION REACTIONS** **112**
  Aromatic transition state approach : 118

CHAPTER 2 ORGANIC PHOTOCHEMISTRY **127-198**

- **Introduction** **127**
  Thermal Energy 127
  Activation Energy 128
  Photochemical Energy 130
- **PHOTOCHEMICAL EXCITATION** **130**
  Light Absorption 130
  Experimental Techiques 130
  Electronic Transition 131
- **JABLONSKI DIAGRAMS** **132**
  Intersystem Crossing (ISC) 133
  Energy Transfer 134

- **Molecular Orbital View of Excitation** **136**
- **The Geometry of Excited States** **137**
- **PHOTOCHEMISTRY OF CARBONYL COMPOUNDS** **138**
  - Reactivity of Electronically Excited Ketones 138
  - Representation of Excited States of Ketones 138
  - Saturated Acyclic Carbonyl Caompounds 139
- **PATERNO-BÜCHI REACTION** **161**
  - Limitations of Paterno-Büchi reaction : 164
  - Synthesis : 166
- **PHOTOCHEMISTRY OF OLEFINS** **172**
- **Geometrical Isomerism** **173**
  - Mechanism: 176
  - Aza Crown Ethers 184
  - Some more Problems and Applications of Photochemistry 186
- **Photorearrangements** **188**
  - Charactersitics of Di-π Methane Rearrangement 188
  - Mechanism of the Reaction (Proposed by Zimmerman) : 192
  - Formation of other Products : 193
- **The Transfer of Excitation Energy (Sensitisation and Quenching)** **194**
  - Collision Energy Transfer -Triplet sensitisation 195

CHAPTER 3 HÜCKEL MOLECULAR ORBITAL THEORY AND AROMATICITY **199-274**

- **1. Molecular Orbital Theory (MOT)** **199**
- **2. HÜCKEL MOLECULAR ORBITAL THEORY (HMO THEORY)** **201**
  - IInteraction Matrix of Some Interacting p Orbitals 204
- **CYCLIC SYSTEMS** **210**
- **Resonance Energy or Delocalisation of Benzene** **218**
- **Vertical resonance energy or delocalisation energy** **219**
- **Molecular Orbital Theory and Aromaticity** **219**
- **Concept of Aromaticity** **220**
- **General Solution** **221**
  - Relative Arrangement of Energy Levels 222
  - Frost Diagram for Cyclopropenyl System 222
  - Frost diagram for Cyclobutadienyl System 224

- **Alternant and Non-Alternant Hydrocarbons (AH and non -AH Hydrocarbons)** **228**
  - Examples of Aromatic Molecules 229
  - Energy level diagram of eight π electron system : 231
  - Preparation of (I) (1,6-methano [10] annulene) 233
- **Aromaticity in Charged Rings** **234**
- **Aromaticity in non-benzenoid compounds - Metallocenes** **239**
- **HETEROCYCLIC COMPOUNDS** **239**
  - Aromaticity / Antiaromaticity in some heterocycles are shown as follows 240
- **Fused Ring Systems** **241**
- **Homoaromaticity** **247**
- **Pseudoaromaticity** **249**
- **More Examples of Aromatic and Antiaromaticity Compounds** **249**

CHAPTER 4 LINEAR FREE ENERGY RELATIONSHIP AND HAMMETT EQUATION 275-296

- **THE SUBSTITUENT CONSTANT σ** **275**
- **THE REACTION CONSTANT, ρ** **277**
  - The Significance of values 278
  - Typical Hammett plots 278
- **The Hammett equation as a linear free energy relationship** **278**
- **Reaction mechanisms and the Hammett equation** **279**
  - σ^+ AND σ^- CONSTANTS 284
- **CURVED (OR NONLINEAR) HAMMETT PLOTS** **285**
- **Non-linear Hammett Plots** **286**
- **Non-linear Hammett Plots** **289**
  - Hydrolysis of the acid chloride of benzoic acids 294
- **SOLVENT EFFECTS** **295**

INDEX **297-302**
